PRINTING :

XYZ Graphics, ABC, Ontario - This major player in the large format market for graphic design and printing is most pleased with the deployment and commissioning of KVAR ECs™.

This facility has sustained 18% savings or more on their electric bills with all cost factors being reduced.

BEVERAGE DISTRIBUTION :

XYZ Distributing, ABC, Florida - This beer distributor is most pleased with KVAR Energy Controllers since electric bills have been reduced by 7.6% over the same time the year before.

The amperage reduction target of 300 amps. was maintained for the great majority of the year, with monthly amperage varying as follows: Jan/321, Feb/299, Mar/290, Apr/295, May/294, Jun/295, Jul/275, Aug/241, Sep/192, etc.

CONTAINER SUPPLY AND MANAGEMENT :

XYZ Container Corporation - They have realized an average of 8.3% savings on electrical usage. They also noted that the KVAR ECs™ installations eliminated “brown outs” which has helped maintain business operations.

DISTRIBUTION CENTERS :

XYZ Group - This KVAR ECs™ deployment is aimed at reducing energy consumption on the operation of 40 motors that drive air conditioning, heating, refrigeration and conveyors at these fine wines, spirits, beer, bottled water and other non-alcoholic products distribution facility.

This state of the art warehousing and distribution center maintains 10% sustained kWh savings.

RECYCLING PLANTS :

XYZ Recycling, ABC, Massachusetts - This is a construction recycling facility comprising 24 motors on conveyers and machines that crush construction material 16 hours a day.

The rationale for installing and commissioning KVAR ECs™ was to reduce demand charges and lower the consumption of electricity on 24 inductive loads. On one 600 hp motor the PF was raised from 0.50 to 0.99 and the amperage was dropped from 245 to 78.

The overall savings for this facility is averaging 19% reduction on monthly electric bills. The ROI is under 12 months.
